

Press Release

Swisslog AG uses netfiles data room for the construction of a new logistics centre

Burghausen, March 14, 2019 – As part of the construction of a new logistics centre for dm-drogerie markt GmbH & Co. KG in Wustermarkt, Brandenburg, Swisslog is responsible both for intra-logistics and for all construction measures. During the planning and implementation phase of this major project, numerous external parties are involved at various locations in Germany and abroad. Swisslog AG uses a virtual data room from netfiles to ensure that all project participants always have access to the most up-to-date project and planning documents around the clock and that even larger documents can be provided reliably and quickly. For Reto Meier, Project Manager Logistics Systems at Swisslog, alternative solutions for data exchange, such as e-mail, are not practicable for these complex projects with a large number of participants and large amounts of data with regard to file sizes, often create a mess of document versions and offer no traceability and control options for project managers.

Ease of use

In the search for a suitable solution for data exchange, Reto Meier focused not only on functionality but also on ease of use. This criterion was also decisive for the selection of the netfiles data room. "The netfiles data room is self-explanatory and very easy to use for both administrators and users", explains Reto Meier and adds "netfiles also convinced us of the price".

About netfiles GmbH

netfiles GmbH was one of the first German providers of virtual data rooms. Over 15 years of experience have established the company as a leading player in this field. netfiles enables businesses to securely share and exchange files and provides a central online document management facility secured by detailed access rights while allowing mobile access. In this cloud-based solution, data can be shared easily and securely within a company, a project team or with customers

and suppliers. Secure data rooms can also be set up for applications such as M&A projects, due diligence audits, asset transactions, board communication, property management and contract management.

Businesses can test the netfiles data room free of charge and without obligation for 14 days:
